

# GRADIMO ZA JUTRI

## PRIROČNIK ZA TRAJNOSTNO GRADNJO S KATALOGOM PONUDNIKOV

### BUILDING FOR TOMORROW HANDBOOK FOR SUSTAINABLE CONSTRUCTION

Handbook *Building for tomorrow* offers information on sustainable building culture, traditional construction methods, local and sustainable building materials, energy efficient construction and certification of buildings.

It includes also the catalogue of SMEs dealing with sustainable materials and sustainable construction:

Target groups: investors (home owners, renovators), public authorities (construction standards), SMEs (from planning to finalization phase), general public.

Handbook is available
