Training modules with the business marketplace

Bovec, October 2014

Training modules with the business marketplace of SMEs who offer sustainable building materials and services were organized in Bovec in October. Event was focused on sustainable construction and renovation.

Lectures tackled issues like: traditional knowledge and experience of our forefathers - can we use it today, ecology vs. economy, contemporary sustainable construction materials, regionally accessible materials, types of cooperation between providers, networking, clustering, etc.

In addition of getting new knowledge this event was also an opportunity of identifying business opportunities, networking and collaboration between SMEs.

Field trip in Slovenia and Austria

October 2014

Soča Valley development Centre organized field trip for decision makers, civil engineers, architects and SMEs who offer sustainable building materials and services. They visited Bohinj, Bled, Luče, Solčava, Železna Kapla, and Šmohor.

Participants were presented with selected good practices of renovations and new constructions of private and public buildings in Slovenia and Austria. They met with members of Slovenian cluster Logične hiše (building sector cluster).

Field trip was also an opportunity for them to know each other, to strengthen cooperation between them and to prepare the ground for the establishment of the SME cluster in the sector of sustainable construction.
