mostZAmost

October 2014, May 2015

AlpBC, together with Camis project, offered students from *Faculty of Architecture* and *Academy of fine arts and design* a hand with organisation of architectural/urbanistic design workshop in Most na Soči.

The purpose of the workshop was to combine the work and ideas of students with the knowledge, experience and needs of locals.

The results can be seen also on the following link: <u>www.mostzamost.si</u>

bird watching

Through the workshop students developed conceptual designs of concrete urban equipment for public spaces in Most na Soči and equipment serving leisure activities along lake shores (two observatories for bird watching and stands for canoes). Focus was on the use of sustainable local materials.
